

impey

THE WETROOM SPECIALIST

THE WETROOM SPECIALIST

Impey are the leading name in wetrooms, pioneering many of the innovations which make the luxury and style of a wetroom accessible to all.

Enjoy an outstanding showering experience - with more space to relax and refresh. It's a great way to enhance your lifestyle and add value to your home, and with Impey there's a comprehensive choice of solutions to suit everyone and every living space - from designer style apartments and hotel suites to family bathrooms, period residences, smaller flats and en-suites.

Every Impey wetroom comes with impressive specialist technology built in, to ensure a great performance, easy installation and a complete leak-free solution. Our products are designed and manufactured in the UK, and come with excellent guarantees for a lifetime of luxurious showering.

Why choose a wetroom?

Wetrooms add luxury, style and visual appeal to a home, and provide the perfect showering space even in the smallest areas. They create a sense of space, dedicated to luxury and relaxation plus practical level access to the showering area.

Wetrooms can be easily installed anywhere, from a ground floor space to a loft conversion, and their walk-in or walk-through design makes them accessible to everyone. They're easy to clean and maintain, and with Impey WaterGuard® your walls and floors are 100% watertight with a lifetime guarantee*.

The perfect leak-free, risk-free solution, for any location.

*Lifetime of tiles.

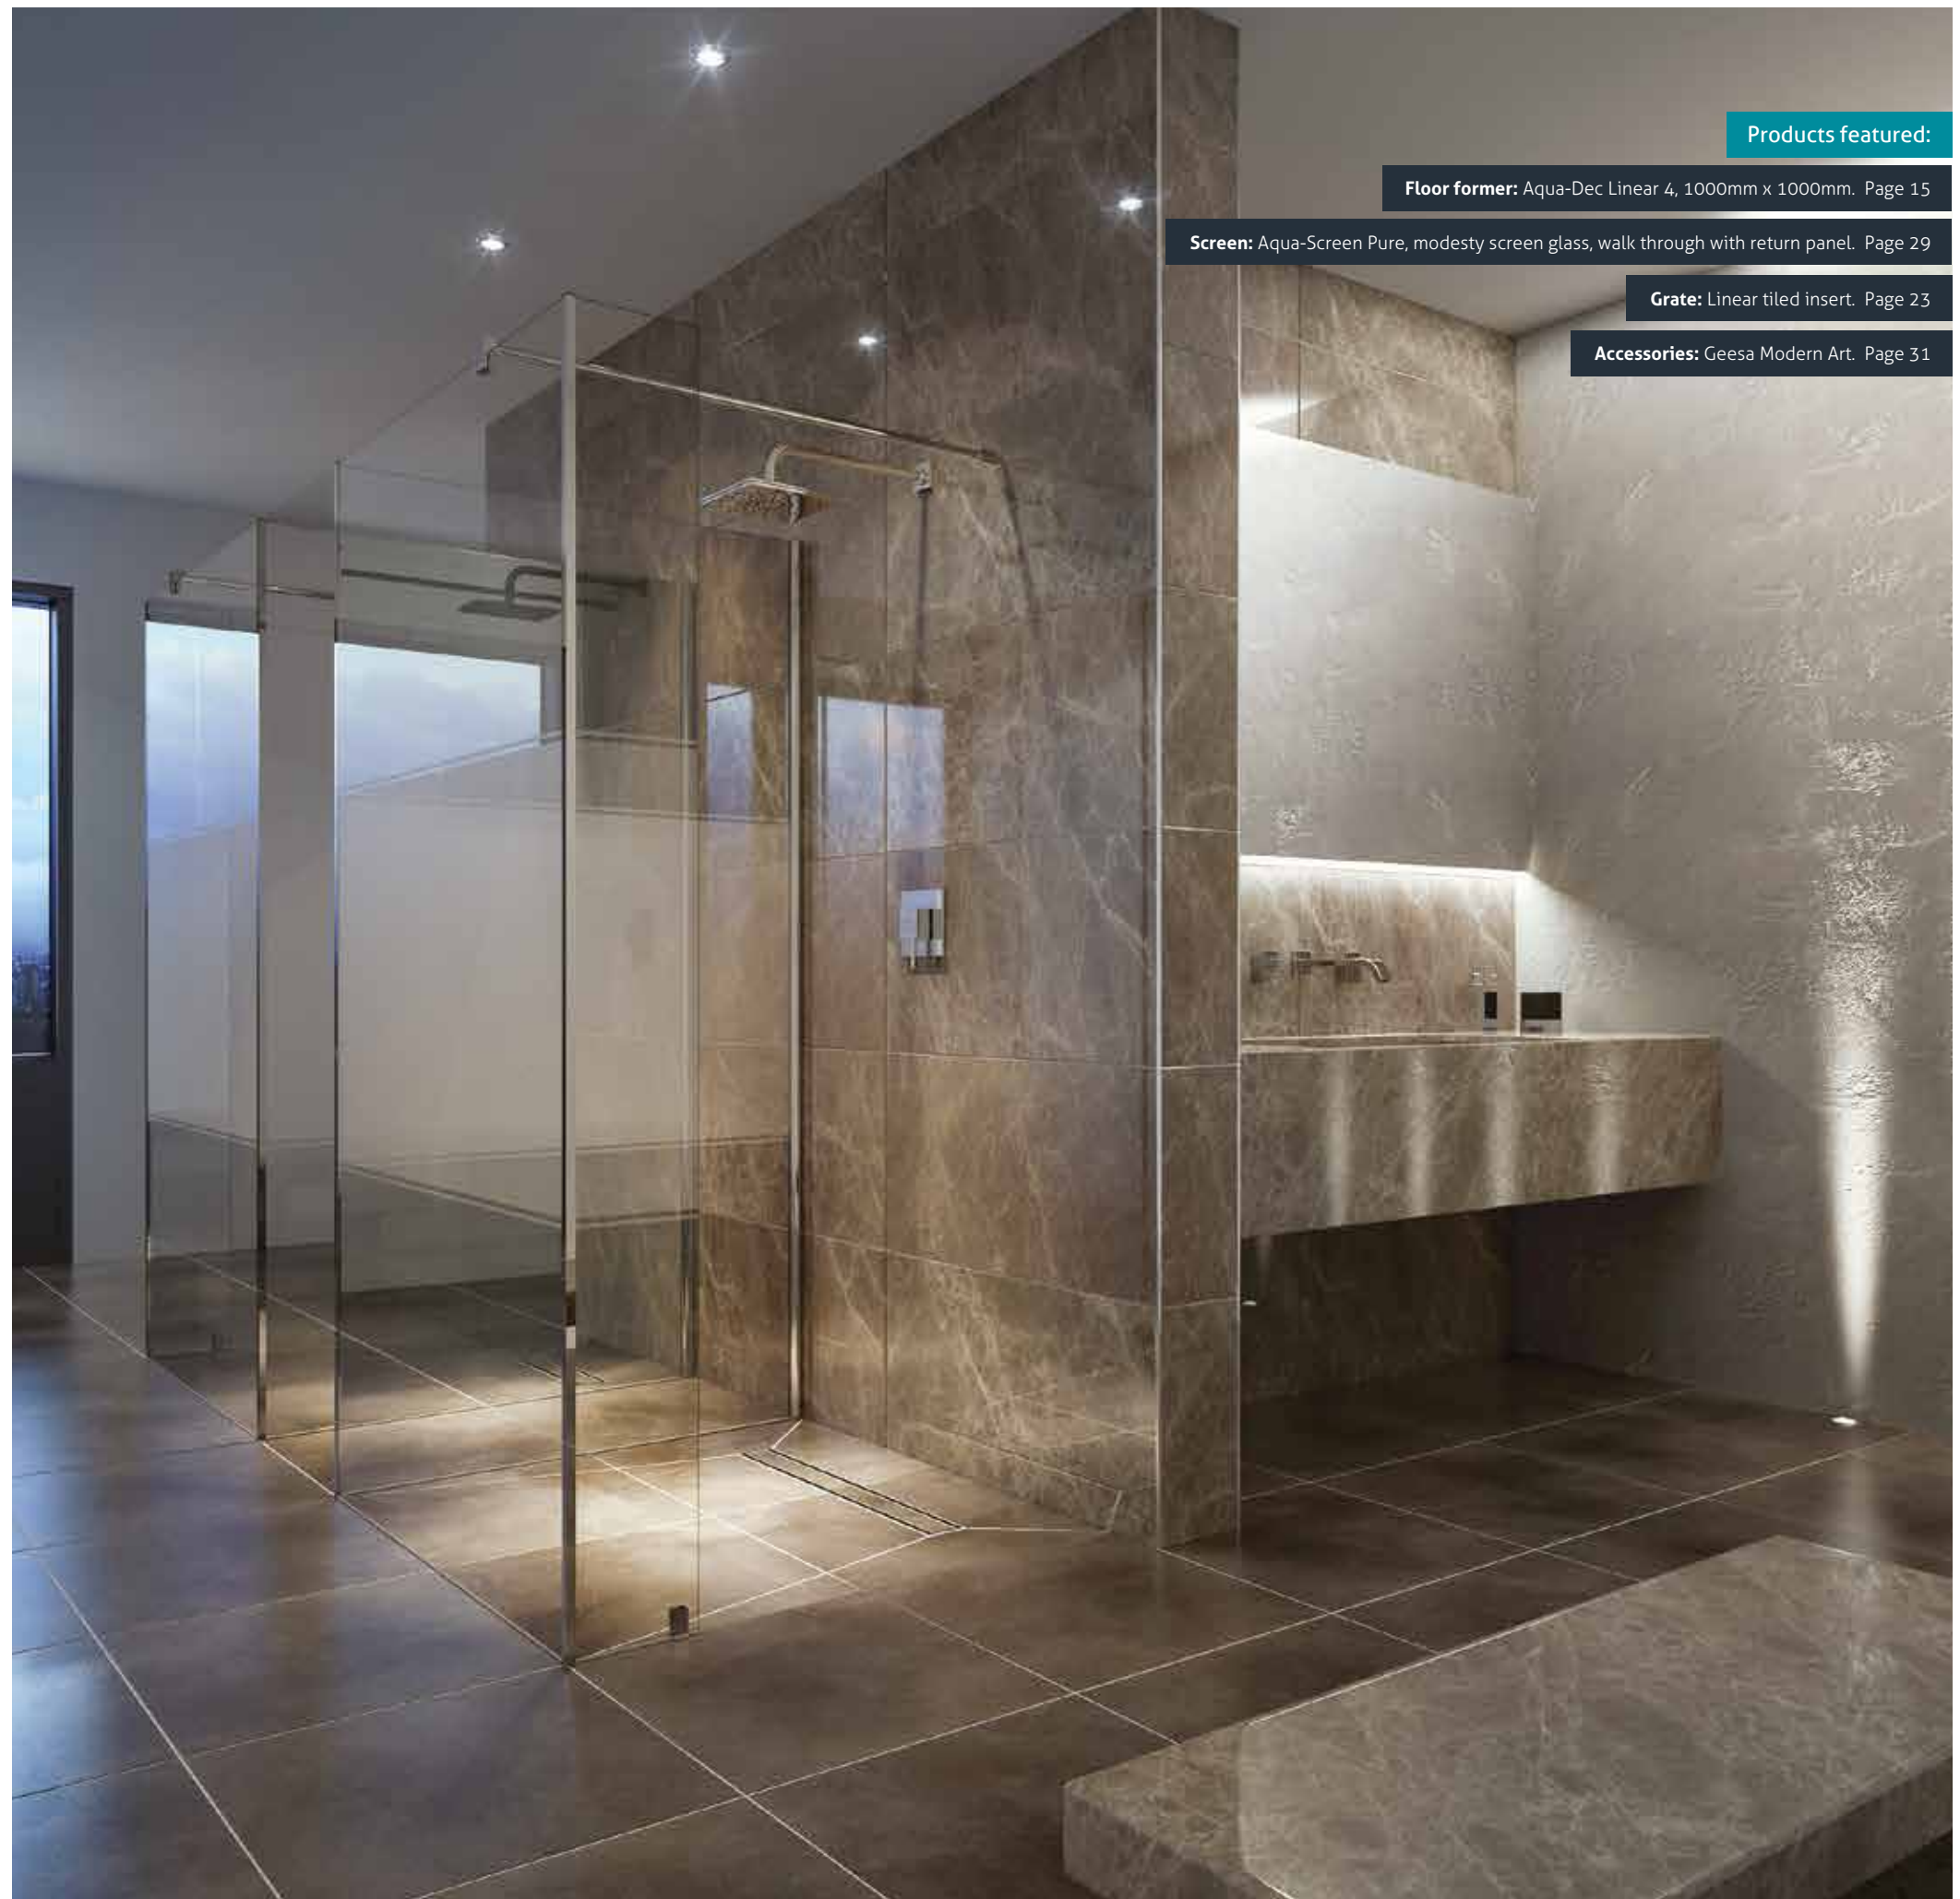

Before

In a traditional bathroom, with separate bath and shower, space is restricted and the room can seem cluttered.

After

The open, attractive design of a wetroom creates a sense of space and style, with a clean and uncluttered look that adds a touch of luxury.

Products featured:

Floor former: Aqua-Dec Linear 4, 1000mm x 1000mm. Page 15

Impey recommends - perfect wetroom solutions for every space and location

Smaller spaces

Even where space is limited - as with en-suites - you can add a wetroom with Impey. Our floor formers start at just 800mm x 800mm, and they're designed for easy installation in confined areas. There's a comprehensive range of sizes to make the most of the room you have available.

Creative spaces

Make creative use of angled space under the roof in attics and loft conversions with a wetroom. EasyFit® floor formers overcome the installation on joists of wooden floors - and WaterGuard® provides complete leak-free protection for both the floor and walls.

Period and classic properties

Add an extra touch of comfort to the wetroom with Impey's Aqua-Mat underfloor heating mat. Fitted under the tiles, it provides a warm floor and the ideal room temperature. Perfect for keeping period and classic property bathrooms - which are often draughty spaces - cosy and warm.

Contemporary

A stylish wetroom adds the 'wow' factor to hotel rooms and suites as well as enhancing the customer experience for guests. Opt for an Aqua-Dec Linear 2 floor former, combined with a stainless steel linear drain and a single glass panel to create a 5-star look.

Larger bathrooms

With larger family bathrooms now featuring in many new build homes, a wetroom makes the most of the extra space. Combine our largest 1500mm x 1200mm EasyFit® floor former with our new 10mm glass panel for a smart, contemporary finish.

High-end commercial

In high-end commercial locations, wetrooms enable you to achieve a contemporary, minimalist look. We recommend one of our larger floor formers with a tiled linear drain, and if privacy is a consideration - for instance, in shared spaces - add a modesty glass panel.

Luxury properties

Wetrooms are ideal for aspirational spaces. Think big with one of our Aqua-Dec linear 3 1800mm x 800mm floor formers - matched with a stainless steel drain and a minimal single glass panel for a stylish, sophisticated look.

Bespoke solutions

With a wetroom you can think differently about cloakroom space - for instance, it will provide a practical yet attractive wash-down area for when the family come in from the great outdoors. Fit with WaterGuard® to seal the showering area.

A perfect wetroom in four simple steps

As the UK's leading wetroom manufacturer we pride ourselves on simple, beautiful solutions born through decades of innovation and product refinement. This has resulted in a wetroom system that is the easiest and quickest to install.

Begin by following these four simple steps.

Step 1. Floor Former

First select the floor former that's right for the situation. There are five types to choose from in the Impey floor former range.

Page 12

Step 2. Waterproofing

We've made creating a perfect waterproof and leak-free environment simple with our WaterGuard® technology, designed and tested for use on both floors and walls.

Page 18

Step 3. Underfloor Heating

A highly recommended finishing touch to add real comfort to your wetroom. Aqua-Mat is a highly efficient underfloor heating system fitted under the tiles.

Page 20

Step 4. Glass Panels & Accessories

Complete your wetroom with your choice of tiling, and accessorise with a newly designed stylish grate and glass panels. Finish your wetroom look by adding extra touches with accessories from the Geesa range.

Page 24

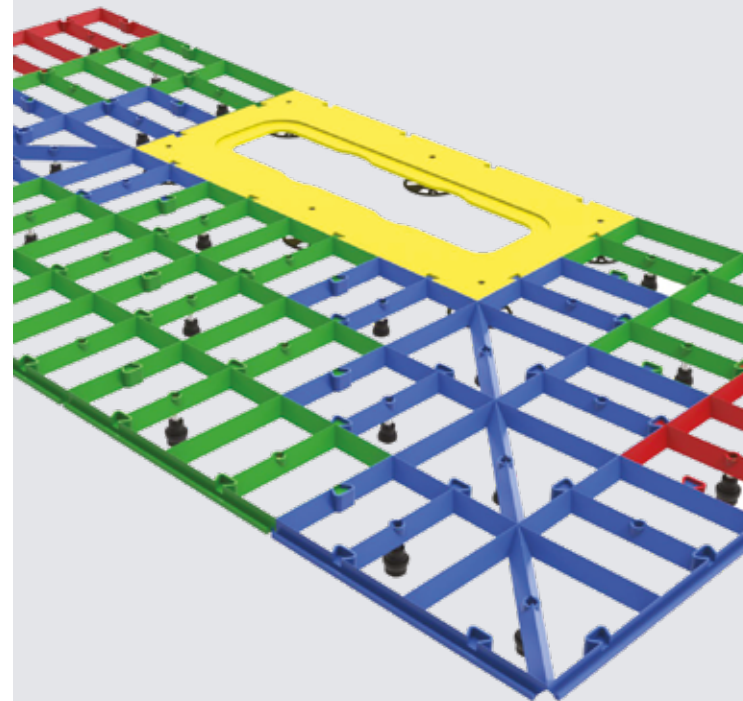

A range of solutions

Impey are committed to extensive ongoing investment in research and development, enabling us to continually introduce technical advances and innovations which strengthen our wetroom solutions.

Constant attention to the product range sees further refinements to floor formers, protection for walls as well as floors with WaterGuard® and additional drainage/grate options.

Wetroom Floor Formers

A comprehensive choice, for a perfect fit every time. Lifetime Guarantee as standard*

Achieving the correct gradient for your wetroom floor is essential for efficient drainage, and Impey's unique and innovative floor former technology makes it easy to install. Floor formers are fitted directly onto joists and then tiled upon to create the complete wetroom solution. With four types of floor former to choose from, including Aqua-Dec EasyFit® and Aqua-Grade (for new pour concrete floors), you can achieve a perfect result in any situation.

Aqua-Dec EasyFit® floor formers are the strongest and most rigid available. They are tested to take weights up to 47 stone with no extra support - yet lightweight and portable, which enables installation to be faster. All floor formers and drains are compatible with mixer and power showers.

Aqua-Dec Linear 2

Features two gradients to assist flow to the linear drain. The Aqua Dec Linear 2 is the perfect solution for corner or alcove settings, with no need for diagonal cuts in the tiles the Linear 2 creates a stylish and simplistic look to your showering area.

Aqua-Dec Linear 3

3 way uniformed fall featuring an 800mm drain with all sizes. The Aqua Dec Linear 3 can be fitted not only in corner and alcove settings but also in a walkthrough environment. The drain sits close to the wall offering a seamless and open showering space. The Linear 3 is trimmable by up to 75mm from the central waste and comes in a large range of sizes, including those to replace a bath.

Aqua-Dec Linear 4

Features four gradients to assist flow to the linear drain. The Aqua Dec Linear 4 offers a unique appearance and is incredibly versatile. The Linear 4 can be fitted in a corner, alcove or walkthrough setting as well as in the middle of your bathroom for that ultimate wetroom experience. A range of sizes are available including either a 600 or 800mm wide drain.

Aqua-Dec EasyFit®

The UK's most popular specified and strongest wetroom floor former available.

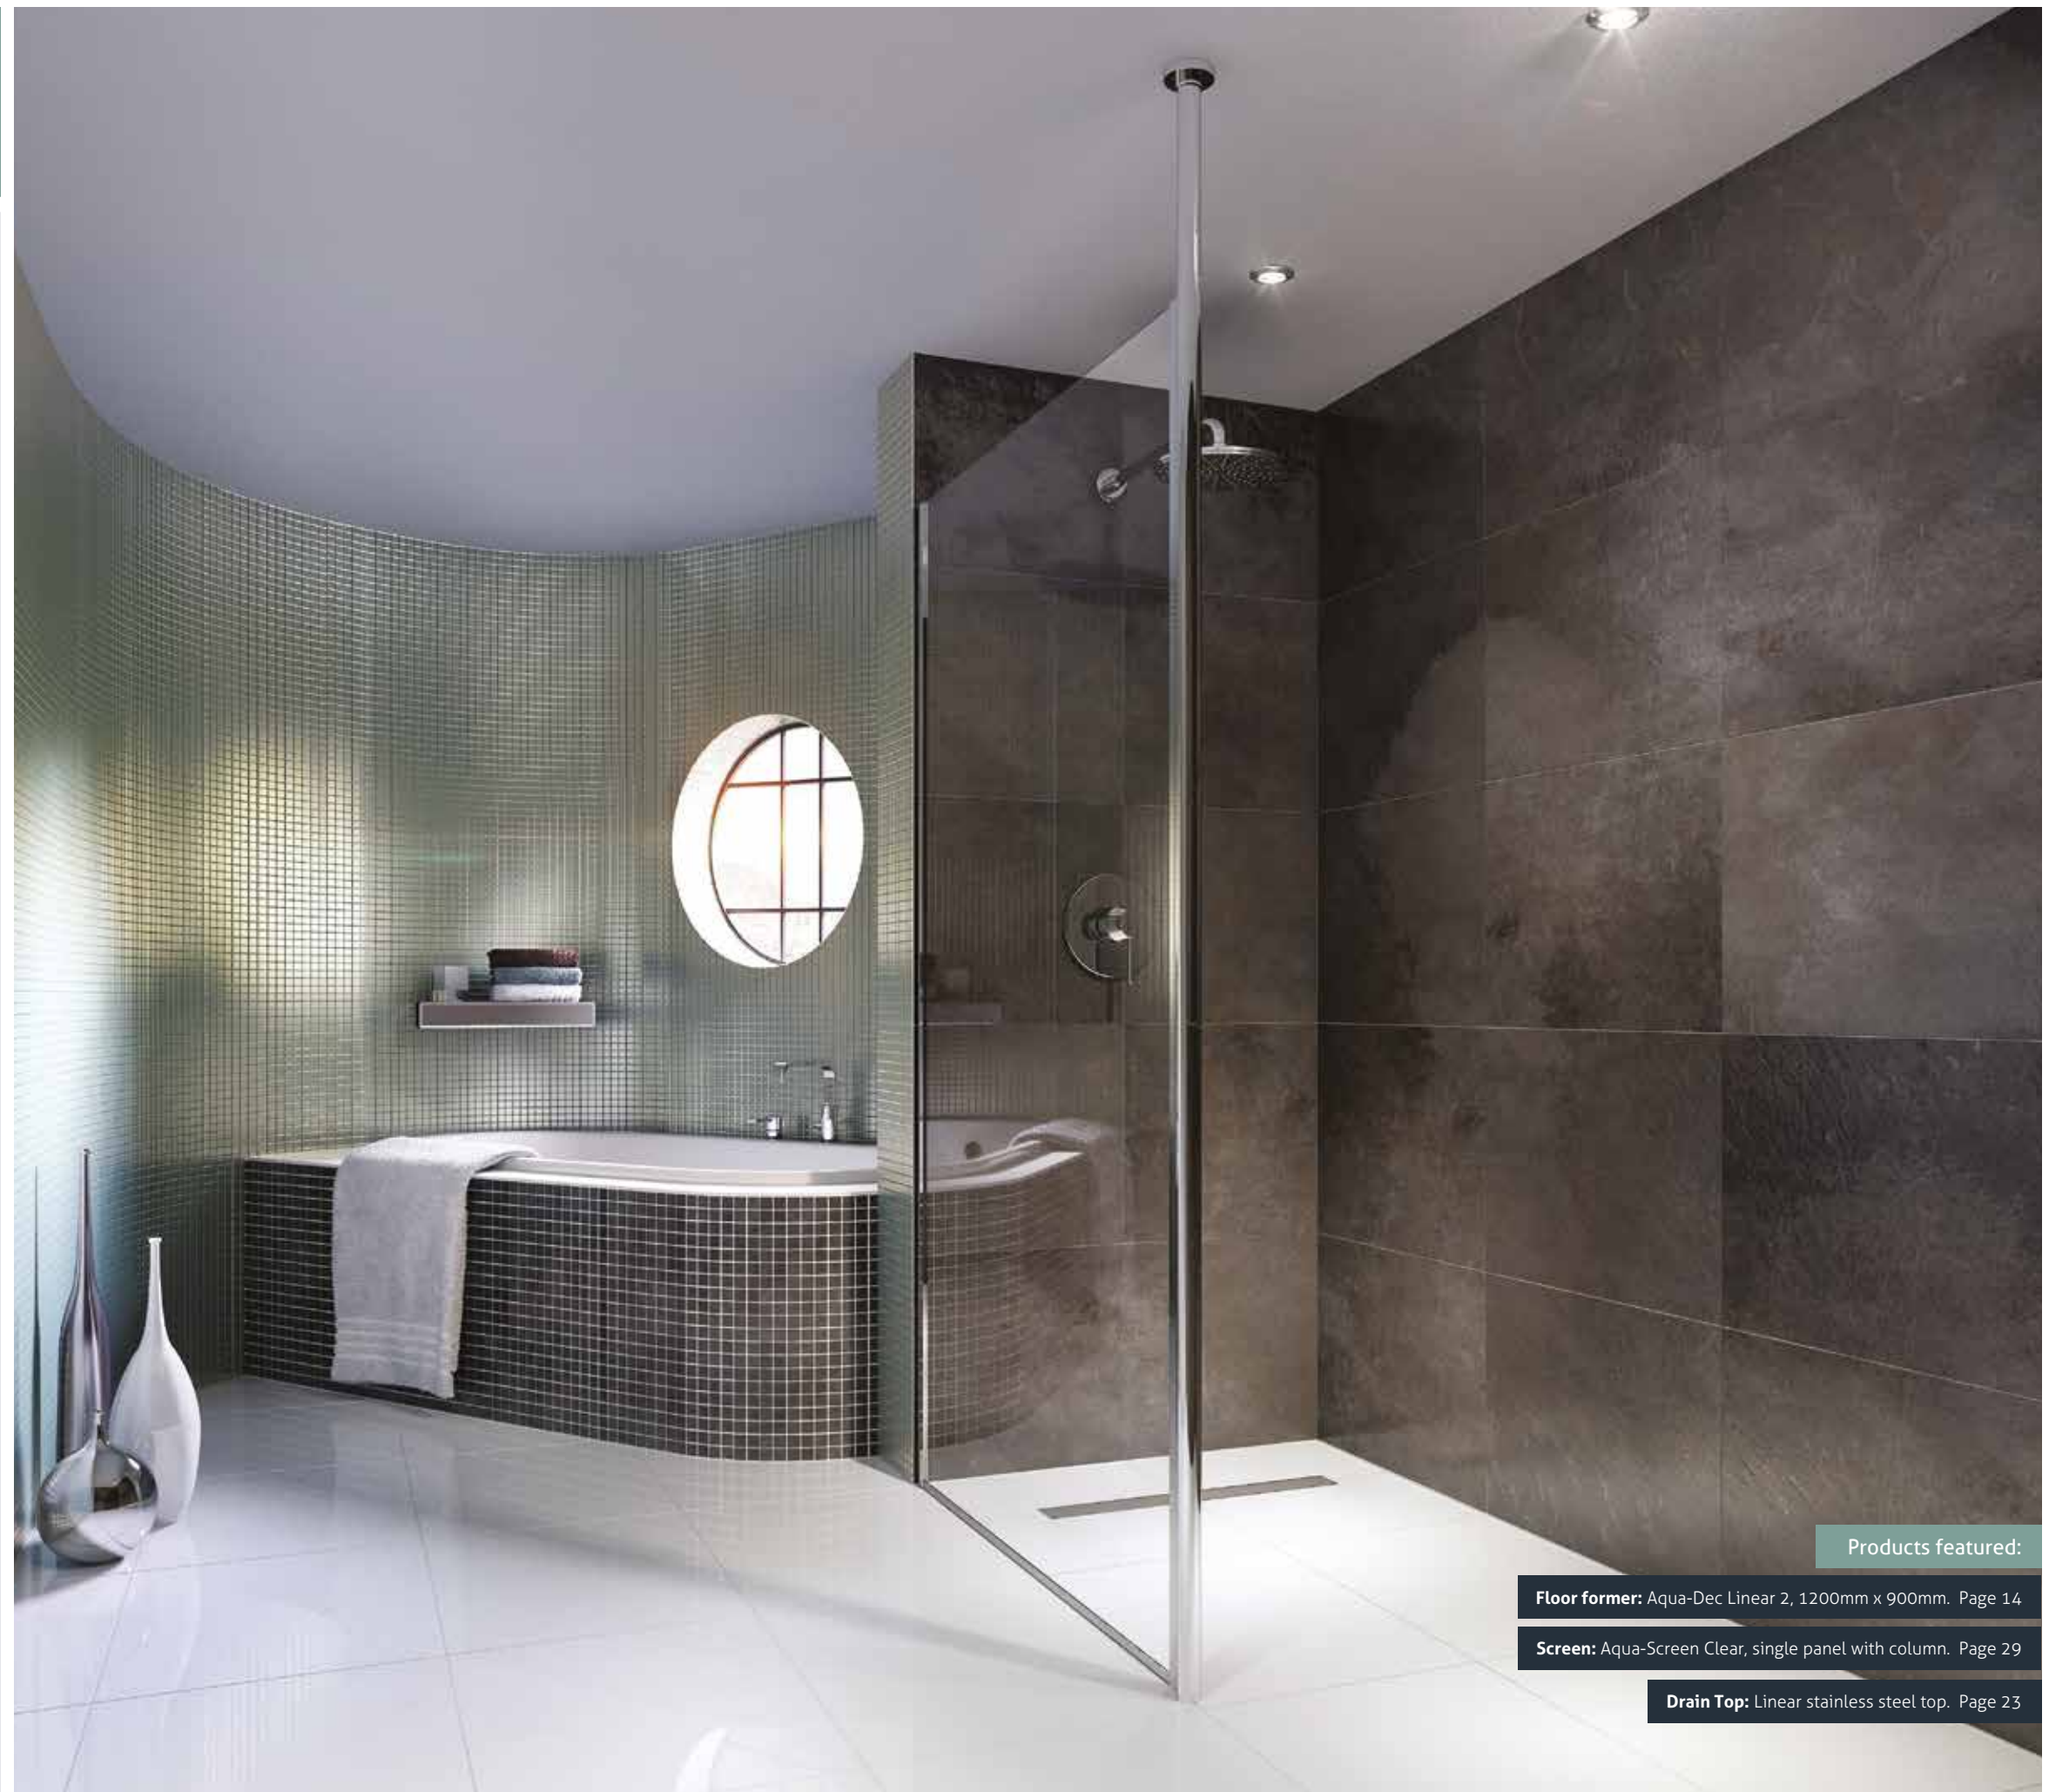

Made for use with wooden floors with joists and concrete floors. No under boarding is required**, significantly reducing both installation cost and time.

Aqua Grade and Aqua Grade Linear

The quick and easy way to create the perfect gradient for new pour concrete floors.

* Lifetime of the replacement of tiles.

** If joists are no more than 400mm centres.

Products featured:

Floor former: Aqua-Dec Linear 2, 1200mm x 900mm. Page 14

Screen: Aqua-Screen Clear, single panel with column. Page 29

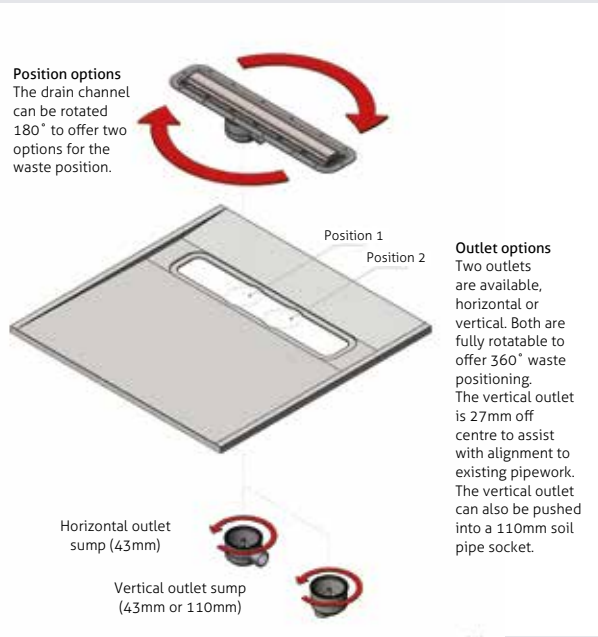

Drain Top: Linear stainless steel top. Page 23

Aqua-Dec Linear

The UK’s market leading Linear Drainage floor former, Aqua-Dec Linear, is available in three models in varying sizes to suit your space requirements and choice.

All Impey Aqua Dec Linear floor formers have:

- Height adjustable tiling frame from 6-26mm
- High flow rates of up to 42 litres per minute
- Adjustable drain outlet position which can be rotated up to 180degrees
- Horizontal or vertical drainage outlets available (horizontal as standard)
- Brushed Stainless Steel drain top as standard (other options available)
- Full install guides, fixings and screws supplied - install straight out of the box
- Backup Technical support

NB. Only Aqua-Dec Linear 3 is trimmable

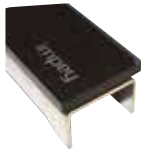

Aqua-Dec Linear 2

Features two gradients to assist flow to the linear drain

The Aqua Dec Linear 2 is the perfect solution for corner or alcove settings, with no need for diagonal cuts in the tiles the Linear 2 creates a stylish and simplistic look to your showering area.

Key Features of Aqua Dec Linear 2

- No diagonal cuts
- Tiling upstands
- Two gradients

Aqua-Dec EasyFit®

The UK's most popular specified wetroom Floor former - for all floor types.

EasyFit® floor formers can be simply installed on wooden floors or concrete.

The Aqua-Dec EasyFit® is just 22mm thick at the outer edge, which is the same depth as a standard floorboard. EasyFit® features a revolutionary patented 360 degree rotating plate - simply remove the required area of floorboard and fix the floor former directly to the joists for a flush finish, unlike raised shower trays.

Complete range of sizes

Available in twelve sizes from a compact 800mm square to 1850 x 900mm - to suit any floor space.

No underfloor boarding required

The floor former is fitted direct to the joist which significantly reduces installation time*.

Easily trimmable

Can be cut anywhere to help with installation constraints, e.g. bespoke walls or around soil pipes.

Flexible with all flooring

Easily fitted on wood and concrete floors as the underside spoke pattern provides strength and the ideal surface for bonding to concrete.

*Based on if your joists are no more than 415mm centres.

Installation made easier

Unique to the Impey EasyFit former, the drain plate can rotate 360 degrees to avoid all underfloor obstructions. The drain has three locating rings, to provide a superior hold between the dec and the rotating drain plate.

Lighter and stronger

Made from strong but lightweight material, Aqua-Dec EasyFit® is designed to bear loads of up to 300kg (47 stone).

Supplied complete with drainage

EasyFit® floor formers are supplied with a standard UTT01/H tiled floor gully and standard grate. Other designs are available.

Additional options available, see page 38.

Aqua Grade and Aqua Grade Linear

Recommended for new pour concrete floors

Aqua-Grade provides a quick and easy alternative way of creating the perfect gradient for new pour solid floors.

Colour coded modular sections click together to form the matrix – which you then simply fill with screed, reducing installation time by up to 50%. Available in square grate and linear grate versions.

The possibilities are endless...

The Aqua-Grade modular system enables you to build the perfect wetroom floor on any concrete floor, whatever its specific requirements. Each section has the exact gradient built in, so a consistent fall is always achieved - eliminating pooling and saving time. Aqua-Grade is designed to be installed directly onto the sub-floor and is especially suited to uneven surfaces as it can be easily levelled by adjusting the individual feet to provide the perfect platform.

Aqua-Grade is available in standard sizes or can be ordered in bespoke sizes as required. It is compatible with Aqua-Mat underfloor heating and WaterGuard® and is guaranteed for life.*

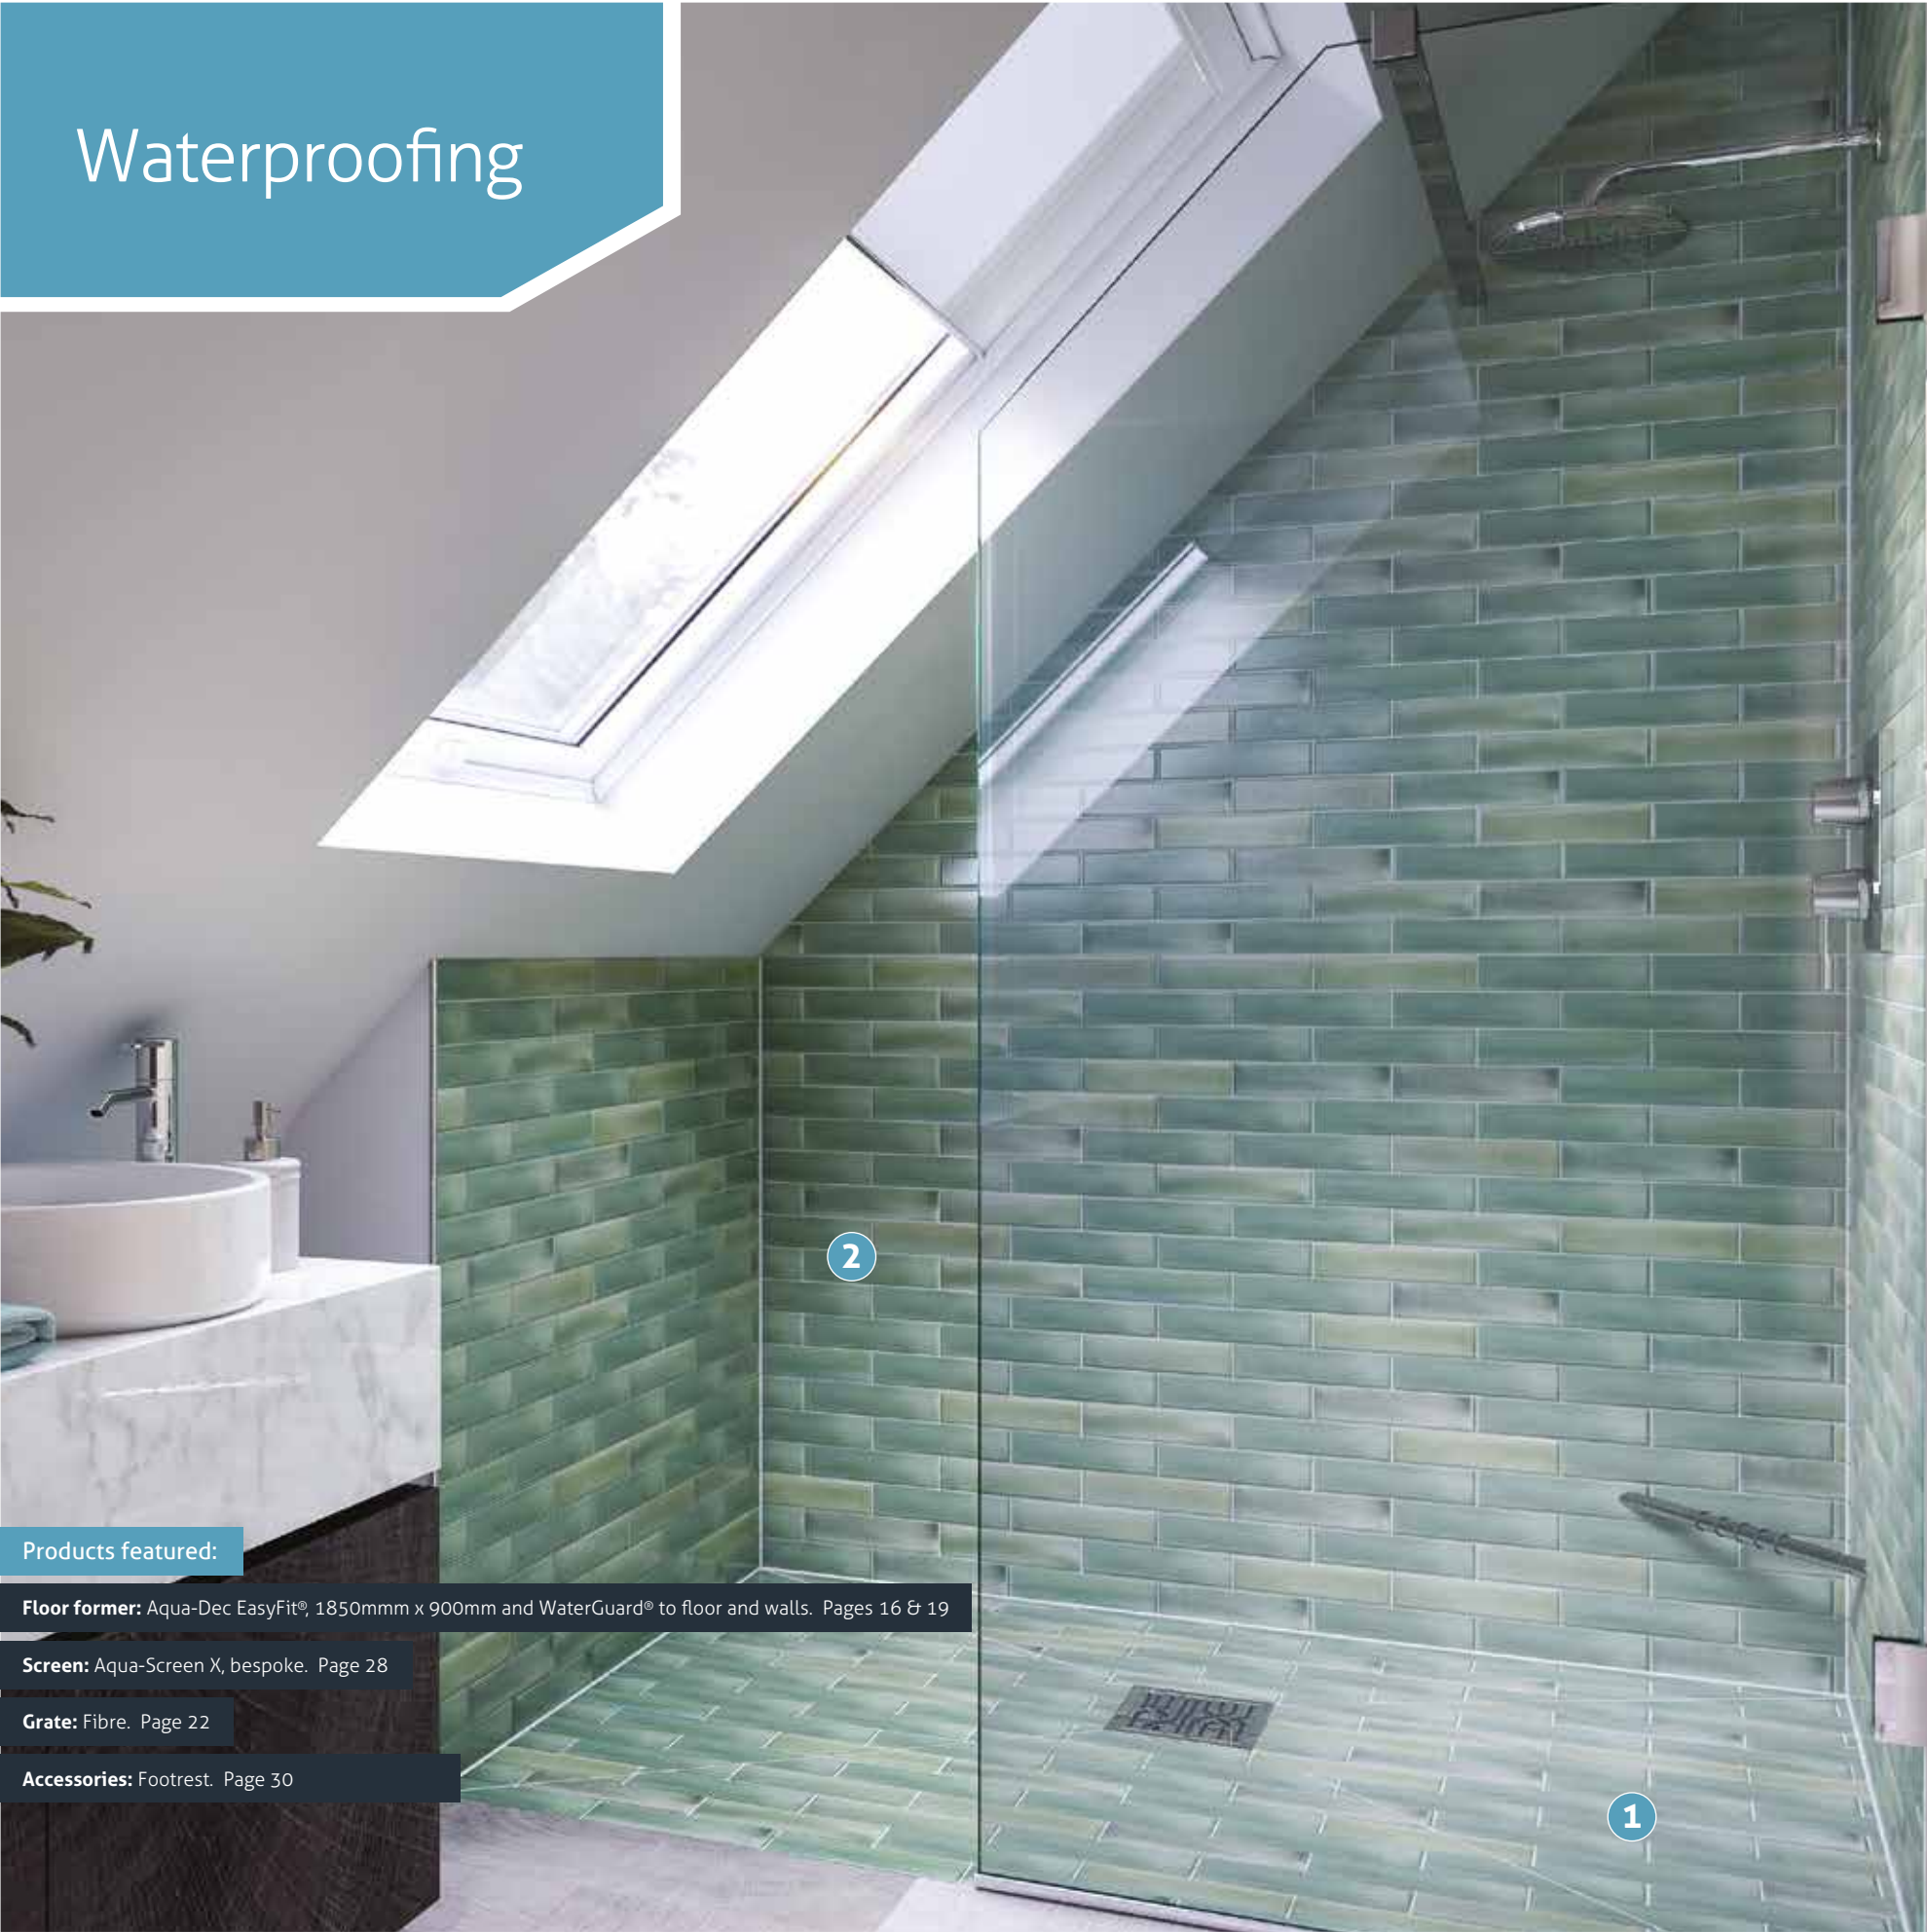

Aqua-Grade

Aqua-Grade Linear

Aqua-Grade floor formers are supplied with the recommended drain in various options for tiled and vinyl floor applications. See page 23 for all options.

Waterproofing

Alternative Linear drain tops

Linear Tiled Insert

The Linear Tiled Insert Top is an alternative option from the brushed stainless top supplied as standard with any of our Aqua-Dec Linear and Aqua-Grade Linear floor formers. The Tile insert option is designed to be used with tile thicknesses between 8-10mm in thickness. To add this to your order please choose from the options on page 39.

Linear Glass & Stainless Steel Insert

The Linear Glass and Stainless Steel Insert Tops are alternative options to the brushed stainless top supplied with any of our Aqua-Dec Linear and Aqua-Grade Linear floor formers. To add this to your order please choose from the options on page 39.

Drainage

All our drainage products are designed by our in-house design team and manufactured by Impey, specifically for Impey Decs. Our drainage options have a height adjustable stainless steel top, suitable for floor tiles 6mm-26mm deep.

All Aqua-Dec EasyFit® and Aqua-Grade floor formers are supplied as standard with the UTT01/H tiled floor gully with a horizontal outlet (vertical outlets available on request) - a high quality water trap featuring a 50mm water seal and 43mm outlet.

Glass Panels

Stylish glass panels complete the luxurious wetroom look. Our new range of panels are great looking, with a choice of plain or satin glass finishes and the option of etched modesty panels. They feature easy-clean Aqua Shield, a microscopically thin coating which creates a permanent protective layer with an incredibly smooth and crystal clear surface. This prevents the build-up of limescale and grime, reducing the need for cleaning by up to 70%, while maintaining the glass panel's smart sparkle and shine.

There's a choice of panel designs to help you create exactly the wetroom design you want, from a walk through to a closed unit, and they're all superbly engineered to make them easy to install.

Features of all our glass panels:

Aqua-Screen X, Aqua-Screen Clear and Aqua-Screen Pure are 2000mm high

Soho Shower Screens are 2100mm high

8mm toughened safety glass to EN12150 standard

New Aqua-Screen X range features 10mm toughened safety glass

All our panels are finished with Aqua-Shield, a microscopically thin coating that prevents the build up of limescale and grime, thus reducing cleaning time by upto 70%

Corner panels can be hung left or right

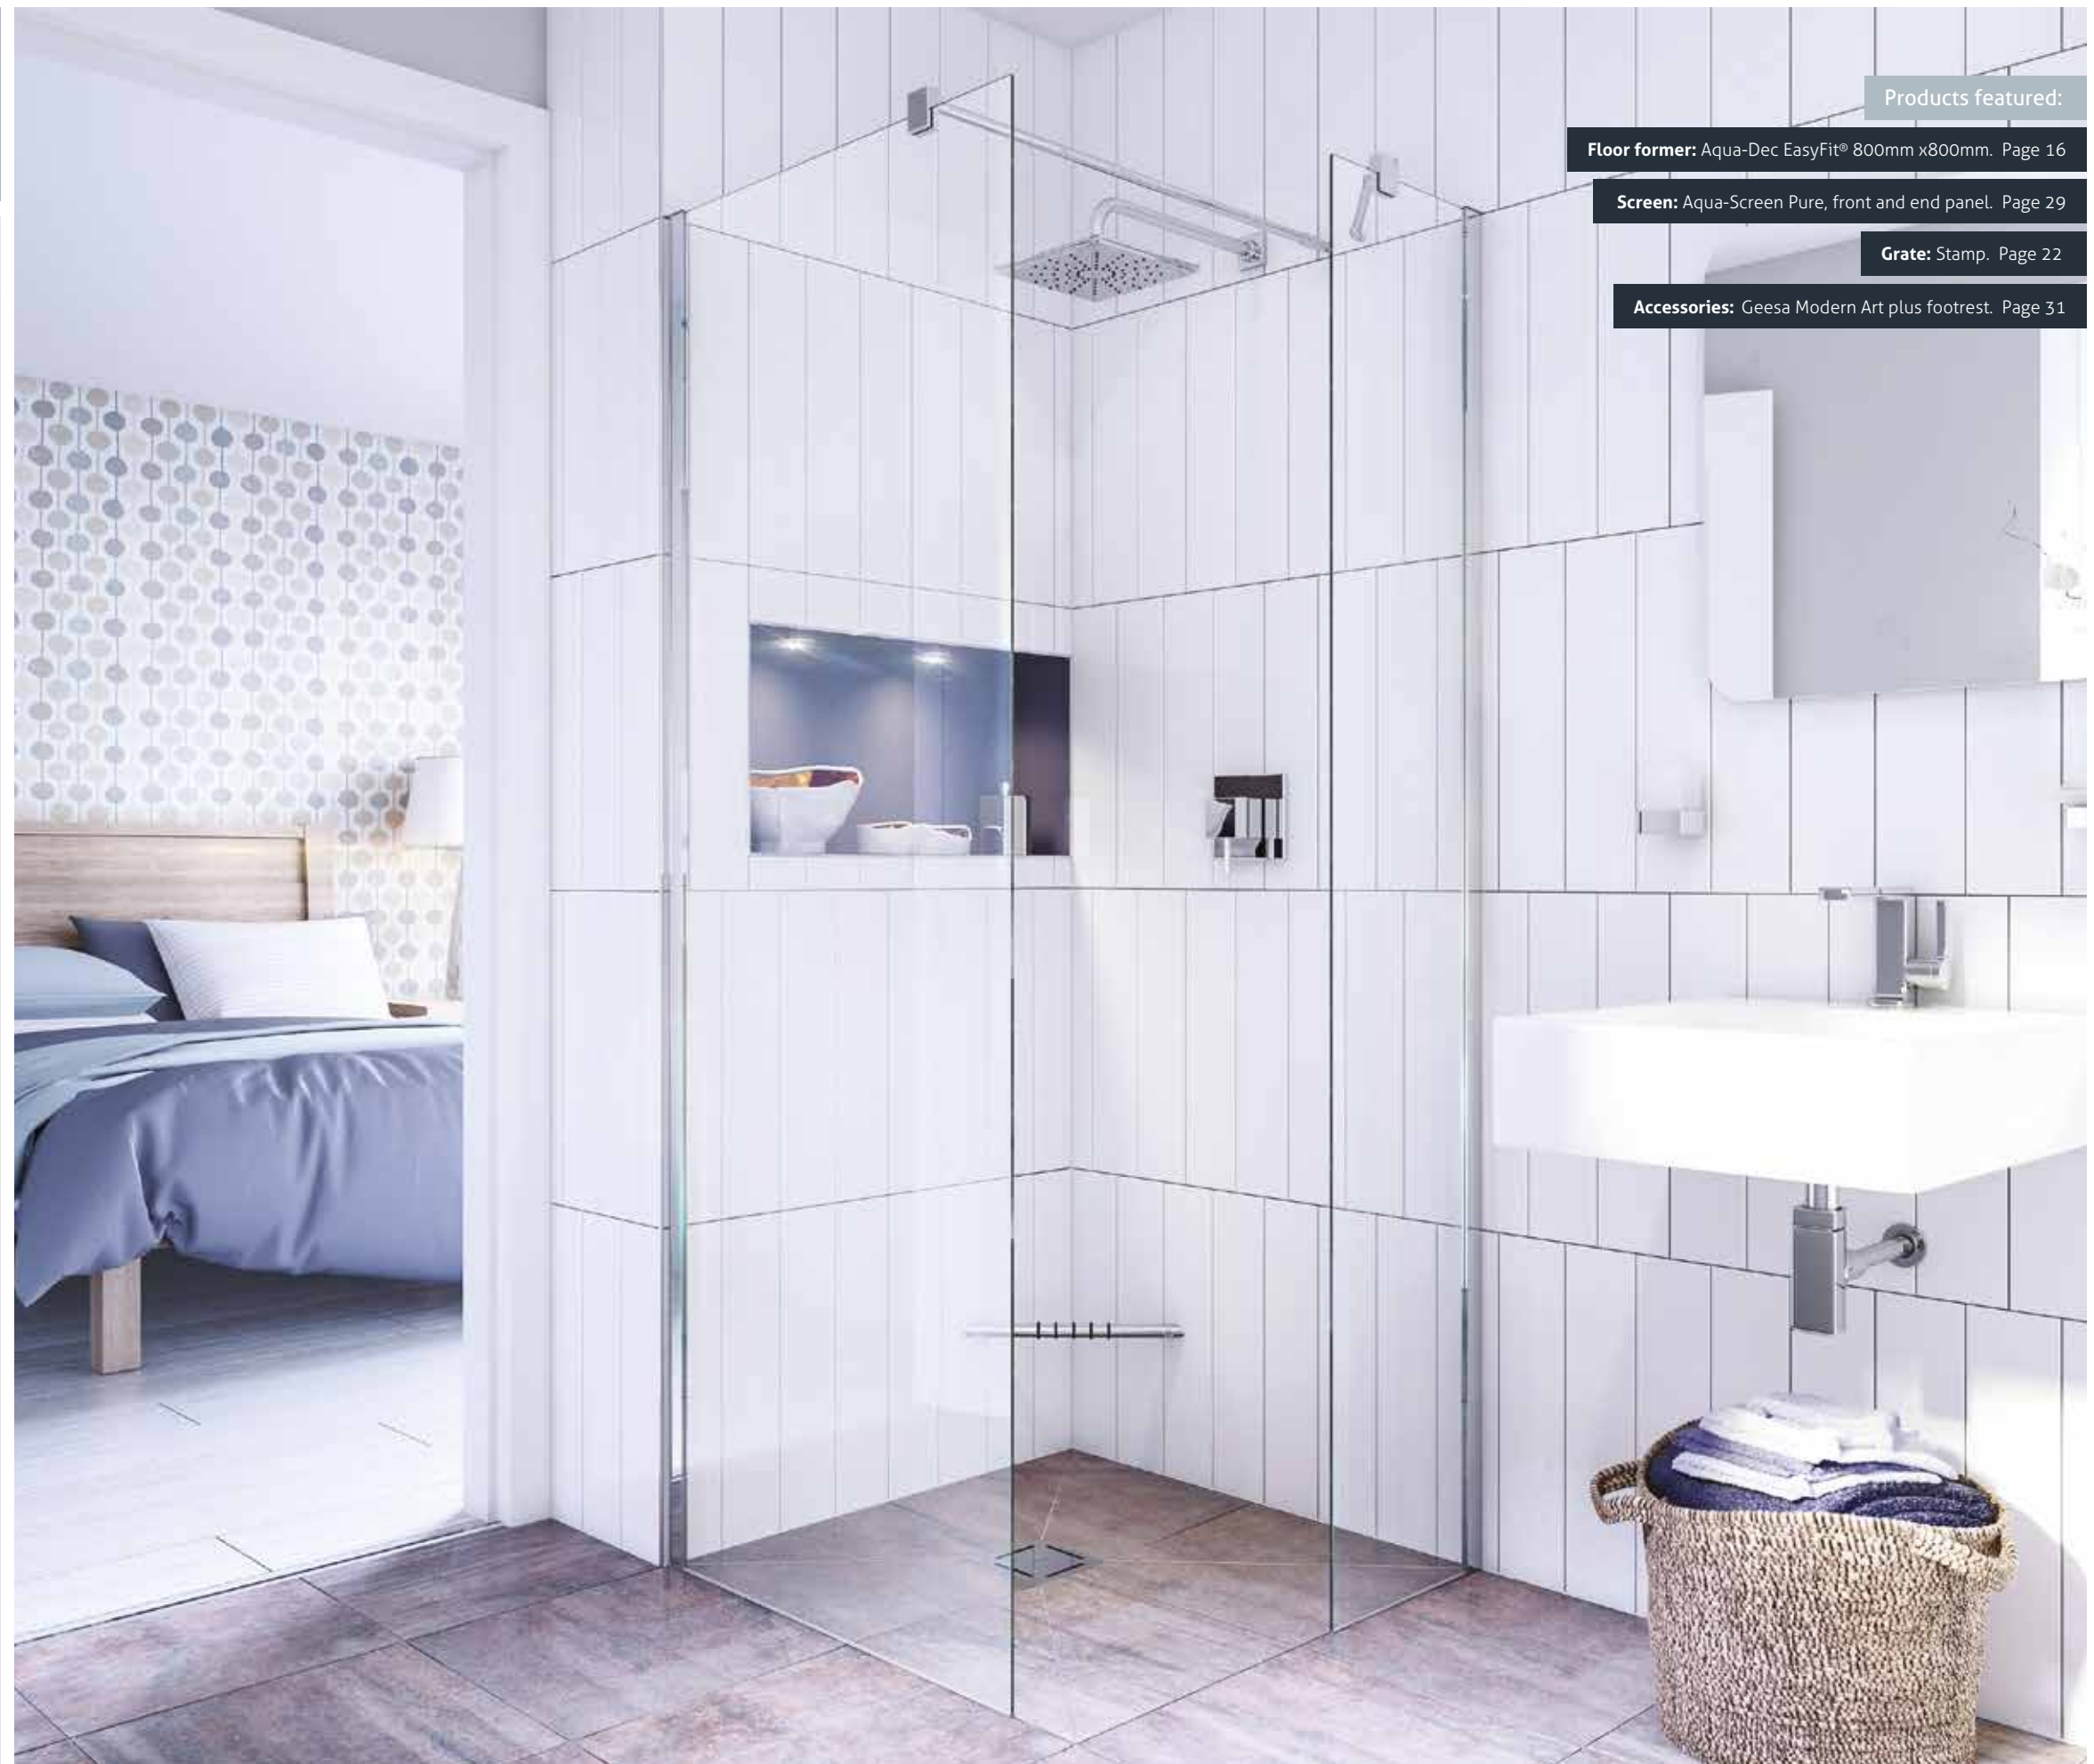

10mm adjustment for out of true walls

Can either be fitted with a slimline tray or a wetroom floor

CE tested and compliant with BSEN14428

Lifetime guarantee*

* Impey Showers Ltd. guarantees its range of branded showering products against faulty materials or manufacture for a lifetime, provided that they have been installed and maintained in accordance with the manufacturers instructions.

*VAT at 20%, correct at time of going to print.

Can be installed directly onto floor joists at 415mm centres with no additional support or bedded into screeded floors.

*VAT at 20%, correct at time of going to print. †For joists under 415mm - centre to centre spacing.

Aqua-Grade System

Aqua-Grade provides a quick and easy alternative way of creating the perfect gradient for new pour solid floors. Colour coded modular sections click together to form any size of matrix - which you then simply fill with screed, reducing installation time by up to 50%. Available in centre drain and linear versions.

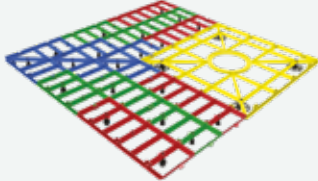

Aqua-Grade

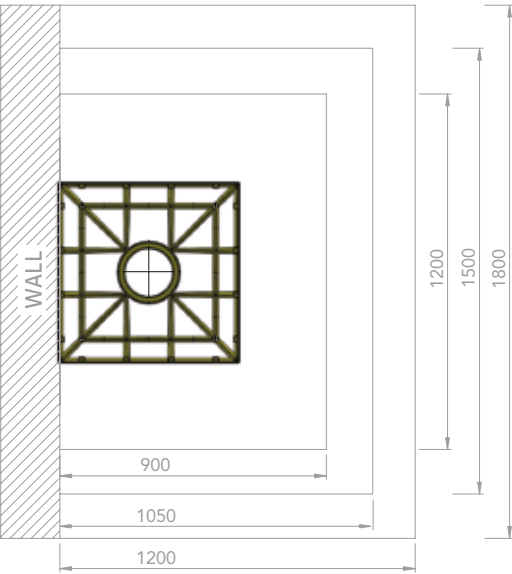

All Aqua-Grades are supplied with brushed stainless steel grate as shown and a UTT01/H Tiled Floor Gully horizontal outlet as standard.

For alternative drainage and grate options for tiled and vinyl floors see pages 38 & 39.

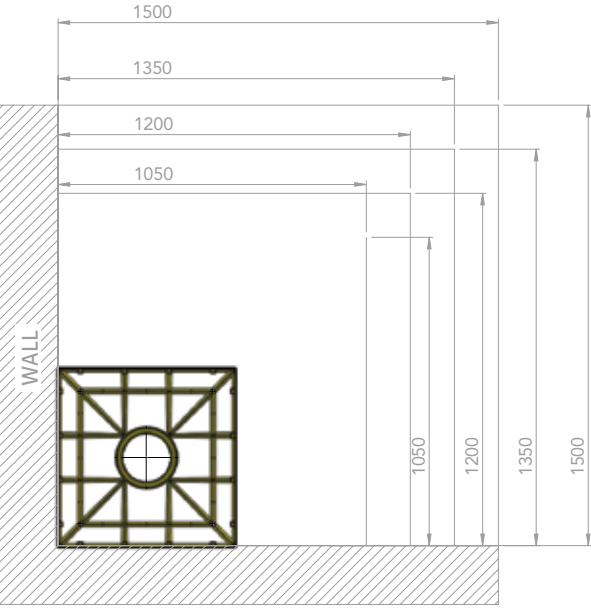

Foot mounting plates for mounting on insulation are available (if required).

Drainage

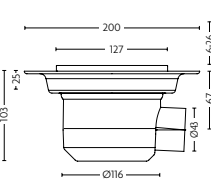

Impey Universal system

The Impey Universal Trap comprises a set of interchangeable components which are combined to make a range of drain products. The range includes both linear and wet floor drains for use in corresponding Impey floor former systems, as well as standalone linear drains for use in a concrete screeded floor.

The term 'Universal Trap' is used in reference to the trap and sump components which are shared across all drain configurations.

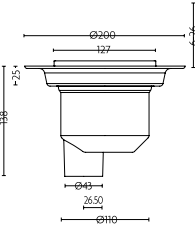

All EasyFit® floor formers are supplied as standard with the UTT01/H or UTT01/V tiled floor gully with a horizontal or vertical outlet - a high quality water trap featuring a 50mm water seal and fixed 43mm outlet.* They also come complete with the 'Slot' standard stainless steel grate.

*As a 1:40 fall

| WaterGuard® Tanking Kit

WaterGuard® provides the complete leak-proof sealing solution - not just for floors but also to walls thanks to Impey's unique and market leading design.

Wall kits also available

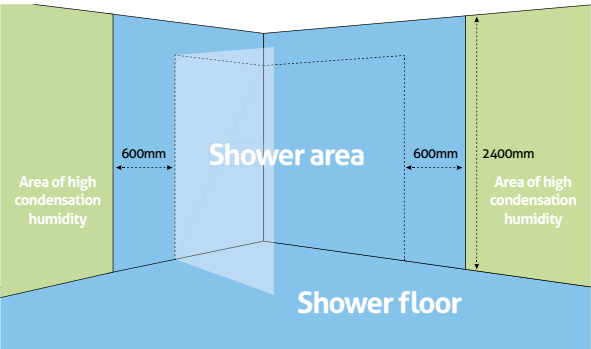

WaterGuard® is the perfect application for waterproofing walls, tested for use on Plasterboard, Cementboard and Plyboard. WaterGuard® can safely support vertical loads of 30Kg/m².

Code: WG10W
Price: £339.30 Exc. VAT
£407.16 Inc. VAT*

We advise that waterproofing membrane is applied to the entire floor area to guarantee a completely watertight finish. Unlike many other systems, WaterGuard® can be tiled as soon as it has been fitted, saving both installation time and cost.

Zoning headline

100% lifetime Watertight Guarantee

Zone 1:

The Wet Zone is the minimum recommended application for WaterGuard® on walls to safeguard the wall substrate against water migration. This should always be applied 600mm beyond the showering area.

Zone 2:

Optional depending on wall substrate and room.

Note: The whole floor is a Wet Zone area and we recommend WaterGuard® should be applied before using WaterGuard® on the walls.

For further information and advice, watch the video at [impeyshowers.com](https://www.impeyshowers.com)

As wetroom specialists, our focus at Impey is on technical excellence combined with aesthetic appeal - creating practical solutions for every sort of location and installation.

Innovation and investment

Impey have created and introduced a series of market leading innovations, from the first wetroom floor with inbuilt gradient to guaranteed leak-free membrane systems. We invest extensively in research and development and advanced technology, designing all our products in house and evaluating all aspects of their performance to deliver outstanding wetroom solutions for every situation.

Heritage and knowledge

Our status as market leaders is a reflection of the experience and expertise of our team. We are genuine specialists, with our focus solely on wetroom and associated products. Our knowledge and understanding of the sector is comprehensive, and is embedded throughout the company - from sales and customer service to technical support.

Installer thinking

Many of our technical team come from specialist design and engineering backgrounds, giving them in-depth insight into the challenges faced by specifiers, interior designers and installers. This has enabled us to develop products which deliver both easy, efficient installation and outstanding results in every location.

Designed and built in the UK

All our products are designed and built by Impey. UK based technical support and spare parts are readily available, and our products are created with national home conditions and regulations in mind. Over 300,000 of our wetrooms have been successfully installed throughout the country.

Impey guarantees

All Impey wetroom products come with excellent guarantees covering manufacturing and materials, to ensure complete peace of mind for specifiers, installers and end users. For more information on Impey guarantees please visit www.impeyshowers.com

Training Opportunities

Get in touch with the Impey technical team who will discuss any training opportunities, including product insight and installation guidance.

Call the helpline on **01460 258 682** or register online at www.impeyshowers.com/training

The UK Coram Group

Coram International, established in 1983, is the parent company of a large number of operating companies and the owner of leading bathroom brands, Coram Showers, Showerpods, Impey Wetrooms and Geesa.

Our co-ordinated product development and production is focussed on the specific market requirements of each country and our main emphasis is always on innovation.
