Vanity to Match Fitted Furniture Guide

Our Vanity to Match Fitted Furniture collections are designed to standalone or be used to complement our larger Calypso fitted furniture range, offering versatility in your bathroom design.

This guide will walk you through the simple steps to order and assemble your vanity unit for a stylish bathroom upgrade.

Design your vanity in four simple steps

Choose Your Unit

Browse the Vanity to Match Fitted Furniture section of the brochure to find your perfect vanity unit. When you order using a unit kit code, all of the parts that you need for assembly are included.

Select a Finish

Each collection is showcased in one finish, with all available finishes listed at the top right of the collection pages. Each unit code in the Vanity to Match Fitted Furniture section of the brochure is followed by two asterisks (**). Replace these asterisks with the finish code located at the top right of the pricing page to complete the code for your desired finish.

Add a Basin

Compatible basins are listed below each vanity and may fit slightly wider than the unit.

The sit-on basins shown are the recommended size and require a worktop. All sit-on basins are universally compatible, but ensure your chosen basin fits your unit's dimensions. Some vanity units need specific worktops, which are available on the collection pages.

Add Accessories

Vanity units are shown with taps, and if applicable, handles, which are sold separately. All additional accessories can be found in our accessories section starting on **page 320.** Some collections offer additional elements to enhance the overall aesthetic or functionality of your furniture and these can be found in the collection pricing pages where available.

Assembly Instructions:

Each vanity unit comes complete with a carcass, panels, soft close fittings, and wall fixings. The pre-assembled carcass simplifies the installation process, saving you time and effort.

These additions can offer both style and functionality to your vanity. Explore

collection pages for further details on accessories.

We recommend using a professional bathroom installer for vanity unit installation to ensure optimal results. Once the carcass is fixed to the wall, apply your fascias, end panels, plinth, basin and other accessories to complete the look of your vanity.

Fitted Furniture Guide

Our fitted furniture is designed with simplicity and functionality in mind. This brief guide will walk you through the straightforward steps to assemble a run of fitted furniture for your bathroom.

When you order fitted furniture, the unit carcass is the foundation – the core pre-assembled structure. Along with the carcass, you'll need fascias, the front panels that define your furniture's external appearance, end panels covering the sides of the carcass for a seamless look, and plinths, concealing the space underneath the unit. Some collections may also offer decorative elements that can be added to enhance the overall aesthetic of your furniture.

When you order using a unit kit code, everything you need is included. The pre-assembled carcass simplifies the installation process. Fascias, end panels, and plinths are then applied, providing a refined finish to your fitted furniture.

Ordering Fitted Furniture

When ordering, notice that each unit code has two asterisks (**). To select your finish, replace the asterisks with the finish code found at the top right of the pricing page. This method ensures that the correct finish fascia panels are automatically included when ordering complete units.

In the example below, the WC unit from our Brecon (BR) collection has a code displayed with two asterisks.

Therefore, if you require the unit in Brecon (BR) High Gloss White (Finish code: H), you would make a purchase using the code: 4226**BRH** (4226 + **BRH**) = Brecon High Gloss White.

Our Vanity collections are smaller collections that feature standalone units complemented by additional pieces offering stylish and functional solutions for your bathroom.

This guide will walk you through the straightforward steps to select & order your vanity unit, to simply elevate your bathroom experience.

Design your vanity in four simple steps

Choose Your Unit

Browse our vanity collection to find the perfect vanity for your bathroom. You will find the kit code listed below the vanity. All units come pre-assembled with a wall fixing kit for installation.

Select a Finish

Each collection is shown in one finish, with all available finishes listed below the vanity with the respective codes.

Add a Basin

Compatible basins are listed below each vanity and may fit slightly wider than the unit.

The sit-on basins shown are the recommended size and require a worktop. All sit-on basins are universally compatible, but ensure your chosen basin fits your unit's dimensions. Some vanity units need specific worktops, which are available on the collection pages.

For most basins with an overflow, you can change the colour of the overflow ring. For more information on basins, worktops, and overflow rings, refer to our accessories section starting on **page 320.**

Plinth panels are used to cover the gap between the lower part of your furniture and the floor. They attach to the cabinet legs using the provided clips. These panels come with finished edges on all sides, and any edges that are cut must be sealed with a waterproof sealant to maintain the warranty. Please note, when positioning a unit that requires a plinth next to one with a floor-reaching front panel, you should allow an extra 50-100mm in plinth length. This extra length is needed to overlap behind the floor-reaching panel, ensuring all gaps are closed.

Plinth panels are used to cover the gap between the lower part of your furniture and the floor. They attach to the cabinet legs using the provided clips. These panels come with finished edges on all sides, and any edges that are cut must be sealed with a waterproof sealant to maintain the warranty. Please note, when positioning a unit that requires a plinth next to one with a floor-reaching front panel, you should allow an extra 50-100mm in plinth length. This extra length is needed to overlap behind the floor-reaching panel, ensuring all gaps are closed.

Reasons to Choose a 561mm Unit

Hidden Pipes Access

561mm carcasses paired with 250mm legs and plinth hide large soil pipes effectively. The removable plinth design provides easy maintenance access, keeping unsightly elements out of view.

Wall-Hung Solution

Install 561 carcass basin and base units without a plinth or legs for a streamlined, wall-hung appearance. Perfect for small spaces, this setup maximises storage while keeping the floor clear.

Accessible Furniture

Use 561 carcass units with a 150mm plinth for a lower-height furniture run. Ideal for those needing improved accessibility, this design combines functionality with a stylish finish.

Stepped Basin Design

Use 561mm carcass with 150mm legs to create a stunning fitted furniture runs featuring a stepped-down basin unit. This stylish design enhances your bathroom space's functionality and visual appeal.

Concept for creating deep sit-on basin units integrated with standard-height fitted furniture.

Plinth panels are used to cover the gap between the lower part of your furniture and the floor. They attach to the cabinet legs using the provided clips. These panels come with finished edges on all sides, and any edges that are cut must be sealed with a waterproof sealant to maintain the warranty. Please note, when positioning a unit that requires a plinth next to one with a floor-reaching front panel, you should allow an extra 50-100mm in plinth length. This extra length is needed to overlap behind the floor-reaching panel, ensuring all gaps are closed.

Plinth panels are used to cover the gap between the lower part of your furniture and the floor. They attach to the cabinet legs using the provided clips. These panels come with finished edges on all sides, and any edges that are cut must be sealed with a waterproof sealant to maintain the warranty. Please note, when positioning a unit that requires a plinth next to one with a floor-reaching front panel, you should allow an extra 50-100mm in plinth length. This extra length is needed to overlap behind the floor-reaching panel, ensuring all gaps are closed.

Plinth panels are used to cover the gap between the lower part of your furniture and the floor. They attach to the cabinet legs using the provided clips. These panels come with finished edges on all sides, and any edges that are cut must be sealed with a waterproof sealant to maintain the warranty. Please note, when positioning a unit that requires a plinth next to one with a floor-reaching front panel, you should allow an extra 50-100mm in plinth length. This extra length is needed to overlap behind the floor-reaching panel, ensuring all gaps are closed.

Plinth panels are used to cover the gap between the lower part of your furniture and the floor. They attach to the cabinet legs using the provided clips. These panels come with finished edges on all sides, and any edges that are cut must be sealed with a waterproof sealant to maintain the warranty. Please note, when positioning a unit that requires a plinth next to one with a floor-reaching front panel, you should allow an extra 50-100mm in plinth length. This extra length is needed to overlap behind the floor-reaching panel, ensuring all gaps are closed.

Worktops

Choosing the perfect worktop to complement your bathroom furniture is a crucial step in your design process. To assist with this, we stock worktops in various types, lengths, and depths to suit the diverse sizes of furniture we offer. These are categorised as follows:

1. Worktops for Fitted Furniture

Our range of worktops is available in three depths to match our fitted furniture: Slim depth (230mm), Standard depth (315mm), and Deep (460mm). These worktops come in various lengths, which can be cut to the specific layout of your bathroom furniture. Where relevant, matching edging strips are available for re-edging and sealing any exposed cut ends.

Square-Edged Laminate Cast Marble

Calvostone Aura Solid Surface

Postformed Laminate Worktops

2. Worktops for Vanity Units

Most of our vanity unit ranges come in standard widths of approximately 600mm, 800mm, and 1200mm. We stock a range of standardised vanity worktops to suit these sizes, providing a small overhang as a safety margin. Worktops for non-standard sized or uniquely shaped vanity units will be listed on the pages where those vanity units are displayed.

Square-Edged Laminate Worktops

A solid particle board core, bonded with high-pressure laminate (HPL), creates a durable worktop. These worktops are supplied with a 20mm square front edge and comprehensive sealing on all surfaces and edges. For custom lengths and exposed cut ends, matching edging strips are also available.

and prevents its growth. This makes it perfectly suited to bathroom surfaces, and means it can also be used in healthcare and food preparation areas

Eco Friendly & Non Toxic

Calypstone Aura is made using a 100% recyclable material. Cutting and sanding it does not release any volatile or toxic organic compounds into the atmosphere. The material is also self-extinguishing, and in the event of contact with fire, no toxic gases are released.

A solid particle board core, bonded with high-pressure laminate (HPL), creates a durable worktop. These worktops are supplied in 22mm Postformed (rounded) front edge designs with comprehensive sealing on all surfaces and edges. Basins

Whether you're looking for a sleek modern basin or a more traditional style, our selection caters to every aesthetic with Ceramic, Cast Marble and Solid Surface options to suit your desired look. Explore our range of sit-in, sit-on, block, inline, semi-recessed and one-piece wing basins.

Cast Marble

Our Cast Marble basins are crafted from Dolomite Marble, a substance born from volcanic processes. Through milling, purification, and blending with polymer resin, they take shape before a protective layer of resin and quartz gel coating is applied, preserving pigment and achieving a flawlessly smooth, durable and easy to maintain finish.

Ceramic Basins

Ceramic basins are meticulously crafted from molten fireclay, shaped into moulds, and expertly glazed before undergoing the final firing process. Their enduring quality makes them suitable for both contemporary and traditional bathroom settings. Ceramic is easy to maintain, as stains can be effortlessly removed, ensuring a pristine appearance.

Solid Surface

Solid surface basins are made from a composite material that mimics natural stone, providing a strong, smooth, and practical choice for bathrooms. Their easy-to-maintain and durable nature makes them ideal for daily use. Solid surface wing basins can be cut and shaped using standard woodworking tools, making them an excellent option for curved units.

Semi Recessed Basins

How to Order Guide: Overflow Rings

When it comes to basins, getting the details right can make all the difference, especially when you're matching them with brassware and handles. That's where understanding overflow rings becomes essential. These rings not only ensure your basin works properly but also play a role in enhancing its overall look and feel.

Use the table below to find the right overflow for your basin and then choose the colour that best matches your bathroom:

Basins with no overflow:

These basins do not have an overflow. Therefore, there's no need for an overflow ring. We recommend using a free-flowing unslotted waste with these basins.

Basins with built-in overflow:

Some basins come with an overflow that is glazed or designed as an integral part of the basin. In such cases, an overflow ring does not apply.

Basins with a standard overflow:

These basins come with a chrome overflow ring as standard. However, the overflow ring is interchangeable, meaning you can change it to match your bathroom.

WHAT IS A RIMLESS PAN?

HIGHEST STANDARDS OF HYGIENE

No hidden spaces for germs to harbour.

Allows for easy cleaning.

Traditional toilets distribute the flush water through a series of holes around the underside of the rim of the pan. However, the 'Rimless' pan does away with this under-rim, meaning the water can flow faster and with no hindrance to create an enhanced flush.

The rimless toilet looks no different on the outside. The main difference is that the pan boasts a smooth bowl with reduced areas for bacteria or lime-scale to build up and settle, which makes a significant difference for cleaning and improved hygiene compared to traditional pans.

PERFECT CLEANING

Unique flush system means the water flows both vertical and around the rim covering the entire surface.

QUIETER & FASTER Rimless technology allows for a more silent and faster flush than standard WC pans.

What is an LED Lighting Strip?

Using an LED lighting strip in your bathroom can enhance both functionality and ambiance. You can install LED strips under cabinets to illuminate the countertop, around the back of mirrors for even lighting, or along the ceiling edges to highlight architectural features.

Supplied in three popular length kits, these lighting strips can be cut to fit any size of unit. The special 3M self-adhesive backing tape allows you to stick them to almost any surface with ease

Zoned Lighting

Water and electricity are a dangerous combination so when choosing bathroom lights it is essential that you familiarise yourself with two terms; Bathroom Zones and IP Ratings. When purchasing bathroom lights you need to ensure that the fitting you choose has the relevant IP rating for the zone in which it is to be placed. So what are IP Ratings and Bathroom Zones?

 $ZONE\ 1 \ \hbox{Incorporates the area directly above the bath or shower tray to a} \ height of 2.25m from the floor. A light with a minimum IP44 rating is required for this area. If the light uses a 240V supply, a 30ma RCD (residual current device) must be used to protect the circuit in this zone. \\$

 $ZONE\ 2$ Covers the area 0.6M outside the bath's perimeter and to a height of 2.25M from the floor. As with Zone 1, a minimum IP44 rating is required for this area.

 $ZONE\ 3$ Outside zones cover areas which fall outside of zones 0,1 and 2 and are well away from any contact with water. No IP ratings are required for light fittings in this area.

Installation must be made in accordance with the current IEE wiring regulations and relevant building regulations.

Calypso recommends that all electrical bathroom products should only be fitted by a suitably qualified Part P registered electrician.

Calypso Essential Information

Product Specifications

Door Finishes and Carcass Colours All our door finishes are supplied by default with the complementary carcass colour indicated on the inside front cover of this brochure. If you require a different combination of fascia and carcass finish, you must specify each separately using individual product codes (shown within the 'Breakdown' section). The relevant finish codes need to be added to each product code when ordering. For exact colour matching, please request a sample by calling 01432 367 367.

Carcasses All carcasses and fascias are pre-drilled and marked for fittings, with fully adjustable all-steel soft-close hinges on doors and soft-close drawer runners featuring four-way fascia adjustment. Carcasses are supplied with hinges, wall-fix brackets, and fittings; base units include adjustable legs and plinth fittings.

Please note that all plinths, end panels and handles must be ordered separately. The unit dimensions shown are overall installed measurements including fascias and plinths. 661mm carcasses are supplied with 150mm legs and 561mm carcasses come with 250mm legs.

You can also choose between three finished base unit depths—218mm, 303mm, and 443mm. All carcasses are made from 18mm MFC and finished with PVC edging.

Doors, Plinths and End Panels All doors, plinths, and end panels are constructed with an 18mm MDF furniture-grade core, ensuring durability and a high-quality finish. There are three available options to choose from: vinyl wrap, painted, and cut and edged. To maintain the warranty, any cut edges must be properly sealed.

For those looking for a natural wood option, the solid oak door features a 70x20mm solid oak frame with an oak-veneered centre panel. As with all natural materials, variations in shade and grain should be expected, adding to the unique character of each piece.

Laminate Worktops Laminate worktops are formed using a particle board core with a decorative laminate surface and balancer on the underside. They are offered in options of square edged and postformed designs and are pre-sealed on all edges. Additional edging strip can be purchased to finish any cut edges.

Decor End Panels When planning, remember to allow for décor end panels on any exposed end-of-run base or wall unit carcass, adding 18mm for each end panel required.

Plinths Our 250mm plinth can also be used as a flyover shelf for additional design features.

Assembly and Drilling All carcasses are supplied fully assembled, with doors and fascia panels packed separately for fitting after installation to help avoid damage. Door and drawer fronts are supplied undrilled for handles, giving you maximum flexibility in handle choice.

Slimline Basin Units Slimline basin units require reduceddepth semi-recessed basins. Calypso units are designed at a height that allows good access underneath to run soil pipes and water feeds, with a choice of 150mm or 250mm plinths.

Soil Pipe Access Due to space restrictions in slimline units, the rear legs should be removed to run a soil pipe through. Rigidity is maintained by the front legs and wall fixings.

Concealed WC Cisterns All our concealed WC cisterns allow front-access servicing. If you use a different manufacturer's cistern, please check service-access requirements.

Dimensional Tolerance Because of materials and production processes, dimensions may vary within a tolerance of ±2mm on furniture, ±3mm on cast basins, and ±5mm on ceramic.

Taking Care of Your Calypso Products

Ventilation and Moisture Control Calypso bathroom furniture is designed for use in domestic environments, making good ventilation essential to prevent damage from excessive moisture—whether on surfaces or in the air. A suitable extractor fan is strongly recommended to avoid condensation and its associated risks. Please note that Calypso timber-based fitted furniture should never be installed in wetrooms.

Sealing and Spills Any cut or exposed panel edges, and any floor or wall abutments with furniture or sanitaryware, must be sealed with a waterproof sealant such as silicone. Wipe clean and mop dry all water spills immediately.

Cleaning Products Never use chemical or abrasive cleaners, bleach, or furniture polishes on bathroom furniture. Clean only with a soft damp cloth and mild soap solution.

Solid Oak An occasional application of wax-based furniture polish will maintain its finish. Do not use household cleaners or abrasive powders on oak. Remove spills immediately with a soft damp cloth and mild detergent; excessive moisture will darken the oak surface.

Ceramic Sanitaryware Clean with a damp cloth and warm soapy water. Rinse with clean water and polish with a soft cloth. Avoid abrasive solvents, acid, or ammonia.

Cast Basins Calypso cast basins are manufactured from a mineral powder/polyester resin, protected by a gelcoat of at least 0.5mm thickness. Clean with a normal liquid detergent (no abrasives) and buff with a quality polish to keep tops in pristine condition.

Brassware Clean with a damp cloth, rinse, and polish with a dry cloth. Avoid cleaners containing abrasive solvents, acid, or ammonia
