Choose Your Vanity Size

Vanity worktops that fit our standard vanity units are categorised into three sizes: 600 Vanity, 800 Vanity, and 1200 Vanity, the size is displayed next to each worktop, make sure the width and depth are compatible woth your chosen vanity.

Each worktop is designed to fit a range of vanity sizes with a slight overhang.

Select a Worktop

Our vanity worktops are available in three options: Square-Edged Laminate, Cast Marble, and Calypstone Aura Solid

Some vanity units use non-standard worktop sizes, and the worktops for these can be found on the pages displaying that collection, along with additional details.

Square-Edged Laminate Worktops

A solid particle board core, bonded with high-pressure laminate (HPL), creates a durable worktop. These worktops are sealed all round with a matching PVC edging for maximum versatility.

Calypstone Aura Worktops

Calypstone Aura solid surface worktops are made from a composite material comprising a natural compound and a high-quality acrylic based polymer binder which creates a surface with the look and feel of natural stone such as granite and marble. It is warm to the touch, 100% nonporous and has the benefit of being able to be cut, sawn, shaped, and worked on using standard woodworking tools.

Hygienic

The Calypstone Aura material contains an antibacterial agent that destroys bacteria and prevents its growth to act as a disinfectant on its own surface. This makes it perfectly suited to bathroom surfaces, and means it can also be used in healthcare

Eco Friendly & Non Toxic

Calypstone Aura is made using a 100% recyclable material. Cutting and sanding it does not release any volatile or toxic organic compounds into the atmosphere. The material is also self-extinguishing, and in the event of contact with fire, no toxic gases are released.

Durable

You can look forward to many years of service from Calvostone Aura worktops. The material does not degenerate naturally nor fade, and if well cared for, will continue to look as good as the day it was installed.

Easy Clean

The inherent properties of Calypstone Aura make it very easy to clean and maintain. It is resistant to most household chemicals and disinfectants and is best cleaned simply with warm soapy water and then dried and buffed with a soft microfibre cloth. Full care instructions are supplied with each worktop.

When it comes to basins, getting the details right can make all the difference, especially when you're matching them with brassware and handles. That's where understanding overflow rings becomes essential. These rings not only ensure your basin works properly but also play a role in enhancing its overall look and feel.

Use the table below to find the right overflow for your basin and then choose the colour that best matches your bathroom:

Basins with no overflow:

These basins do not have an overflow. Therefore, there's no need for an overflow ring. We recommend using a free-flowing unslotted waste with these basins.

Basins with built-in overflow:

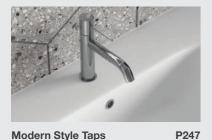

Some basins come with an overflow that is glazed or designed as an integral part of the basin. In such cases, an overflow ring does not apply.

Basins with a standard overflow:

These basins come with a chrome overflow ring as standard. However, the overflow ring is interchangeable, meaning you can change it to match your bathroom.

Waste Types

Our wastes come in two types: slotted and unslotted. If your basin has an overflow, you will need a slotted waste. If your basin does not have an overflow, such as a sit-on basin, you will need an unslotted waste.

WHAT IS A RIMLESS PAN?

Traditional toilets distribute the flush water through a series of holes around the underside of the rim of the pan. However, the 'Rimless' pan does away with this under-rim, meaning the water can flow faster and with no hindrance to create an enhanced flush.

The rimless toilet looks no different on the outside. The main difference is that the pan boasts a smooth bowl with reduced areas for bacteria or lime-scale to build up and settle, which makes a significant difference for cleaning and improved hygiene compared to traditional pans.

No hidden spaces for germs to harbour.

PERFECT CLEANING

Unique flush system means the water flows both vertical and around the rim covering the entire surface.

QUIETER & FASTER Rimless technology allows for a more silent and faster flush than standard WC pans.

What is an LED Lighting Strip?

Using an LED lighting strip in your bathroom can enhance both functionality and ambiance. You can install LED strips under cabinets to illuminate the countertop, around the back of mirrors for even lighting, or along the ceiling edges to highlight architectural features.

Supplied in three popular length kits, these lighting strips can be cut to fit any size of unit. The special 3M self-adhesive backing tape allows you to stick them to almost any surface with ease

Zoned Lighting

Water and electricity are a dangerous combination so when choosing bathroom lights it is essential that you familiarise yourself with two terms; Bathroom Zones and IP Ratings. When purchasing bathroom lights you need to ensure that the fitting you choose has the relevant IP rating for the zone in which it is to be placed. So what are IP Ratings and Bathroom Zones?

IP67. The item is protected from dust and capable of withstanding water immersion upto 1 meter for 30 minutes.

 $ZONE\ 0$ Covers the areas inside the bath or shower tray. If you decide to illuminate this area the fittings must be low voltage and must have a minimum rating of IP67 making them immersion proof.

 $ZONE\ 1$ Incorporates the area directly above the bath or shower tray to a height of 2.25m from the floor. A light with a minimum IP44 rating is required for this area. If the light uses a 240V supply, a 30ma RCD (residual current device) must be used to protect the circuit in this zone.

 $ZONE\ 2$ Covers the area 0.6M outside the bath's perimeter and to a height of 2.25M from the floor. As with Zone 1, a minimum IP44 rating is required for this area.

 $ZONE\ 3$ Outside zones cover areas which fall outside of zones 0,1 and 2 and are well away from any contact with water. No IP ratings are required for light fittings in this area.

Installation must be made in accordance with the current IEE wiring regulations and relevant building regulations.

Calypso recommends that all electrical bathroom products should only be fitted by a suitably qualified Part P registered electrician.

Calypso Essential Information

Product Specifications

Door Finishes and Carcass Colours All our door finishes are supplied by default with the complementary carcass colour indicated on the inside front cover of this brochure. If you require a different combination of fascia and carcass finish, you must specify each separately using individual product codes (shown within the 'Breakdown' section). The relevant finish codes need to be added to each product code when ordering. For exact colour matching, please request a sample by calling 01432 367 367.

Carcasses All carcasses and fascias are pre-drilled and marked for fittings, with fully adjustable all-steel soft-close hinges on doors and soft-close drawer runners featuring four-way fascia adjustment. Carcasses are supplied with hinges, wall-fix brackets, and fittings; base units include adjustable legs and plinth fittings.

Please note that all plinths, end panels and handles must be ordered separately. The unit dimensions shown are overall installed measurements including fascias and plinths. 661mm carcasses are supplied with 150mm legs and 561mm carcasses come with 250mm legs.

You can also choose between three finished base unit depths—218mm, 303mm, and 443mm. All carcasses are made from 18mm MFC and finished with PVC edging.

Doors, Plinths and End Panels All doors, plinths, and end panels are constructed with an 18mm MDF furniture-grade core, ensuring durability and a high-quality finish. There are three available options to choose from: vinyl wrap, painted, and cut and edged. To maintain the warranty, any cut edges must be properly sealed.

For those looking for a natural wood option, the solid oak door features a 70x20mm solid oak frame with an oak-veneered centre panel. As with all natural materials, variations in shade and grain should be expected, adding to the unique character of each piece.

Laminate Worktops Laminate worktops are formed using a particle board core with a decorative laminate surface and balancer on the underside. They are offered in options of square edged and postformed designs and are pre-sealed on all edges. Additional edging strip can be purchased to finish any cut edges.

Decor End Panels When planning, remember to allow for décor end panels on any exposed end-of-run base or wall unit carcass, adding 18mm for each end panel required.

Plinths Our 250mm plinth can also be used as a flyover shelf for additional design features.

Assembly and Drilling All carcasses are supplied fully assembled, with doors and fascia panels packed separately for fitting after installation to help avoid damage. Door and drawer fronts are supplied undrilled for handles, giving you maximum flexibility in handle choice.

Slimline Basin Units Slimline basin units require reduceddepth semi-recessed basins. Calypso units are designed at a height that allows good access underneath to run soil pipes and water feeds, with a choice of 150mm or 250mm plinths.

Soil Pipe Access Due to space restrictions in slimline units, the rear legs should be removed to run a soil pipe through. Rigidity is maintained by the front legs and wall fixings.

Concealed WC Cisterns All our concealed WC cisterns allow front-access servicing. If you use a different manufacturer's cistern, please check service-access requirements.

Dimensional Tolerance Because of materials and production processes, dimensions may vary within a tolerance of ±2mm on furniture, ±3mm on cast basins, and ±5mm on ceramic.

Taking Care of Your Calypso Products

Ventilation and Moisture Control Calypso bathroom furniture is designed for use in domestic environments, making good ventilation essential to prevent damage from excessive moisture—whether on surfaces or in the air. A suitable extractor fan is strongly recommended to avoid condensation and its associated risks. Please note that Calypso timber-based fitted furniture should never be installed in wetrooms.

Sealing and Spills Any cut or exposed panel edges, and any floor or wall abutments with furniture or sanitaryware, must be sealed with a waterproof sealant such as silicone. Wipe clean and mop dry all water spills immediately.

Cleaning Products Never use chemical or abrasive cleaners, bleach, or furniture polishes on bathroom furniture. Clean only with a soft damp cloth and mild soap solution.

Solid Oak An occasional application of wax-based furniture polish will maintain its finish. Do not use household cleaners or abrasive powders on oak. Remove spills immediately with a soft damp cloth and mild detergent; excessive moisture will darken the oak surface.

Ceramic Sanitaryware Clean with a damp cloth and warm soapy water. Rinse with clean water and polish with a soft cloth. Avoid abrasive solvents, acid, or ammonia.

Cast Basins Calypso cast basins are manufactured from a mineral powder/polyester resin, protected by a gelcoat of at least 0.5mm thickness. Clean with a normal liquid detergent (no abrasives) and buff with a quality polish to keep tops in pricting condition.

Brassware Clean with a damp cloth, rinse, and polish with a dry cloth. Avoid cleaners containing abrasive solvents, acid, or ammonia
